(54) BLOCK STACKING STRUCTURE

(57)Abstract:

PURPOSE: To provide a block stacking structure which can be easily executed without dependence on a special artisan, and improves earthquake resistance.

CONSTITUTION: A plurality of block bodies 1 longitudinally provided with a through hole 2 are arranged so that the through holes may continue, and a plate-shaped horizontal reinforcing member 6 which has an attaching hole at the same position as the through hole 2 on a joining face between vertically adjacent block bodies 1 and spreads over at least between right and left adjacent block bodies 1 is arranged. In addition, the block bodies 1 are mutually tightened in one body by a tightening tool 3 arranged in the through hole 2.

LEGAL STATUS

[Date of request for examination] 17.12.1999

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3319808

[Date of registration] 21.06.2002
